I. Information System Review

Look for any area of information systems where you think there might be violations of laws or ethics that we have discussed in class. Please explain in detail the violations you find in the laws or the poor practices in the information system that could lead to unethical behavior, potentially creating vulnerabilities in a system. Make your claims unique and avoid examples we have already discussed in class (such as *Software Piracy*, *etc*.). You may cite specific laws related to information security or cybersecurity that you find relevant.
